Working group 4

Efficient exploitation of highly heterogeneous and hierarchical large-scale systems

Olivier Beaumont and Frédéric Vivien

October 5, 2010

Potential research themes

- Mapping of data and computations
  (potentially with replication)
- Resource management
- Load-balancing
- Scheduling in probabilistic contexts
  (uncertainties, failures, etc.)
- Distributed scheduling
- Communication- and memory-aware scheduling
- Platform modeling (mainly, use of)
